What is the purpose of this exercise?

3) I need to fill out these forms in correct order, as quickly as possible.

Vision

I find a checklist in some way, in mouth, and tick through it.

Brainstorm

- It should include personal etc.
- How to update quickly manual
- How to order manual
- Sending menu home
How to measure efficiency?
- How long from your pages to money has been returned?
- How many resources are needed for administration?

What can go wrong in this process?

- Need to check sum in row with sum in E55

- Hee

What can go wrong in C54?

I just made sure the two first pay:

\[ \begin{align*}
22 &+ 10 = 22 \\
11 &+ 30 = 41 \\
12 &+ 31 = 43 \\
11 &+ 13 &= 24
\end{align*} \]
Are there any relevant research questions?

Expected to fill in:

\[
\begin{align*}
N & \rightarrow N+1 & N+2 \\
\text{confirm} & \rightarrow \text{understand} & \text{validate}
\end{align*}
\]
Purpose

1) I need COBOC data
2) I need a reliable process that gives me COBOC data
3) I need to establish a process for collecting data.

Vision

[Diagram showing SKB and SITS connected by an arrow]
Brain Storm

- Could I describe this piece as research?

- Should I make a checklist, just like in the case of "Revising"?

- What is the purpose of research?

- Finding out whether it is possible to collect more data?

- Find out how long it will take before I get more data?

**Purpose**

⇒ I need to establish myself as a person who can (an old analyst).

**Vision**

When may define the standards, but I would like to check that all fits with reports to RN and that we are having progress on the most urgent issues.

When details the processes and seeks, I redesign this as research.
