"e-learning can support..."

This reads like a project report from a successful project.

Review

1. give all dates and evidence
2. have been interviewed
   endures for a year of bedside
1) \( X \rightarrow \text{human/computer model} \)

2) \( Y = \text{why and in which way decisions are made in selection of feature} \)

3) \( Z = \text{selected feature} \)

1) \( X = \)

2) \( Y = \text{indiscriminant} \)

3) \( Z = \text{indiscriminant} \)
things to predict?

Is PCA a thing?

Well, it predicts that a process will be unequal if we apply PCA method.

Knowledge: things + facts?

Example: What do I know?

I know how to dance strobe.
I know that $e^{i\theta} = \cos\theta + i\sin\theta$.
I know that one can save for 4 million people in Romney (job + med.)
