Gamer theory

2. Liberal Reader

- ideas?

1. Defining rules
2. Applying rules
rules are key, followers
3. frame moderator

S.E.

T.P.

- I try to introduce 188,900 etc.
- I am rejected
- Finally I get acceptance for 188,900!
  but then I get second
- $188,900 is a failure, but the seeds have been planted, making it come more than it was.
8. Discussion

What does the case tell us.

- conflict / power.
- players = QA, S, E, M.
- adversaries = M, power & prestige.
  S, E, avoid splitting our head out, 7-5.

QA = research, the effect

SFL standards, include the effect of various inputs, interactions.
What did we learn?

- ISO 9000 can be used for auditing and training.

- COMA/ISO 15504 are large models and require much work.

S.T. wanted to do as little as possible, decreasing attendance and trying not particularly hard. They enjoyed pregnancy.

- ISD 9000 as handling objects.
What kind of further research comes from this?
