Raffle Title:

Plan:

Term:

13 14 15 16 17
I need to develop some kind of model thing or beam I should go about reading. The explanation appears makes sense, but it is slow.

Different ways of using the RAPRA seem fair and what to read:
1. Method chain → STS
2. Theory chain
Much of my research to date has been driven by wanting to understand how science and statistics work. Now I am beginning to get models that make sense, but I don't know where patent law to contraband matters is much of a concern to science and practice in large.

What are the contraband in my research?

→ Discussion of Regardless
